	GV60PAK	Power Adaptor Kit for the ValorStat Max

RADIANT FIREBOX

Due to the high efficiency compact nature of this product, you may notice some glowing on the ceramic roof panel (shown right). The amount of glow will vary slightly with different fuel effects and vent lengths and is unavoidable without sacrificing some efficiency. This glow will not impact the longevity of the appliance.

ABOUT OUR EFFICIENCY RATINGS

All Valor product literature is published using recognized Canadian and US government test methods for determining energy efficiency performance. This ensures our products will perform in your home as rated. Beware of misleading “steady state” efficiency claims made by manufacturers using their own “in-house” test methods. For example - a large difference between an Energuide rating and a “steady state efficiency” may indicate misleading efficiency claims. Visit www.valorfireplaces.com for more information.

Build your own Legend G3.5 - design.valorfireplaces.com

A LEGEND IN THE MAKING

With over two decades of design innovation and four generations of Legend DNA, it’s no surprise that the Legend G3.5 exudes radiance, high efficiency and the ultimate in comfort control. Clean trims and a large viewing area highlight warm, glowing flames. A contemporary update for existing spaces, the Legend G3.5 is our latest addition to the highly successful Legend Insert family.

RADIANT & CONVECTED HEAT

The G3.5 supplies a constant flow of both radiant heat and naturally convected warm air. Continuously warming objects in its path (including the human body), radiant heat satisfies your comfort needs with up to 25% less overall energy compared to forced air systems.

VALOR DYNAMIC RESTRICTOR TECHNOLOGY (VDRT)*

VDRT increases thermal efficiencies and automatically adjusts combustion air, continually maximizing fireplace performance. Another Valor first! *(Patents Pending)

NO POWER, NO PROBLEM

Engineered to circulate air through natural convection, the G3.5 is highly efficient without a fan - providing reliable heat, even during a power failure.

VALORSTAT MAX REMOTE CONTROL

(Standard with Purchase)

Easily select, adjust and program the desired temperature that you want, saving energy and lowering your overall home heating costs.

Pilot On Demand: Turn your pilot light ON and OFF from the handheld remote for years of additional energy savings.

If the optional 795CFK Fan Kit is installed, the ValorStat Max provides full control turning the fan on and off, as well as adjusting the fan speed settings.

Energy Saving Feature: The Valor SmartPilot System automatically shuts down if there is no activity after 5 days, reducing unnecessary pilot gas consumption.

USE RADIANT HEAT SAFELY

Fireplace surfaces, in particular the glass viewing window, are extremely hot during operation and will remain hot for a period of time after the fireplace is turned off. Contact with the hot glass can cause severe burns. Close adult supervision is required if there are young children, or at-risk individuals in the house. As well, a physical barrier is strongly recommended. Install an approved aftermarket safety gate to keep toddlers, young children and at-risk individuals a safe distance from the fireplace.

For more information please visit www.valorfireplaces.com/safety.

EDGEMONT COLLECTION

Screen & Trim Design Integration

706EBL Enamel Black Liner & 718EDN Edgemont Door Kit in Brushed Nickel (kit includes a 3-Sided Square Trim in Black & 'lift-off' Screen Door)

707FBL Fluted Black Liner & 718EDZ Edgemont Door Kit in Bronze (kit includes a 3-Sided Square Trim in Black & 'lift-off' Screen Door)

706EBL Enamel Black Liner & 718EDV Edgemont Door Kit in Vintage Iron (kit includes a 3-Sided Square Trim in Black & 'lift-off' Screen Door)

707FBL Fluted Black Liner & 718EDZ Edgemont Door Kit in Bronze
